MRL Database Registration

MRL has a database system which is currently being used to register beneficiaries that are eligible to receive a Distribution Payout from MRL. The process of registration includes having your picture and finger print taken, along with other related information such as your name, date of birth and clan.

If you are an eligible beneficiary, meaning that your mother is Lihirian, you are entitled to receive a distribution payment and therefore must register on the database.

If you have registered on the database and have received your MiBank Card, this would mean that there is no need for you to register again and all that you are required to do, is await payment of the 2020 Distribution.

If you have not registered on MRL's Database as yet, you are required to attend MRL's Office at the Tinetalgo Building and the MRL staff can assist to have you registered.

Once you are registered, your registration would go through our verification process and be approved prior to being added onto the MRL Database. Your information on the database is then provided to MiBank to create your bank account, then the cards are distributed to you at your respective village.

18 years

If you have registered however your name is not on the payment listing, it could be that you are not eligible as yet to be receiving a payout as the payment that is currently being made is for the year 2019.
